The interest rate is the rate at which interest is paid on the principal balance of the account. Trumark reserves the right to change the dividend rate, APY, or interest rate at any time, as determined by Trumark. Accrual of Dividends:	Dividends will begin to accrue on the business day you deposit non-cash items (e.g. checks) to your account. If you close your account before accrued dividends are credited, you will be paid closing dividends calculated by the number of days in the dividend period the account is opened.
Balance Computation Method:	Trumark uses the daily balance method to compute dividends/interest on all accounts. The daily balance method applies to a daily periodic rate to the end of day principal balance.
Par Value:	The par value of a regular share in the credit union is \$5. A member who fails to maintain a share balance of at least par value may be terminated from membership.
